Emy,

Thanks for the email. Next Tuesday or Wednesday are fairly open for a call if either of these days would work for you.

We will commit to a quick turnaround for the final review. Thanks for the opportunity to review the document before finalizing.

Brian

Brian, thank you for your comments. They look fairly straight-forward and deal mostly with correcting/clarifying information. It may be worthwhile to pencil in a phone call for next week to discuss how these comments will be reflected in the document. We can also discuss other questions on the additional recommendations. I plan to send that language to you on Tuesday of this week.

As I recall, EPA had agreed to provide a revised version of the five-year review for a (very) short review before going final. If I can incorporate changes in the next two weeks and get another EPA internal review, I would hope to have a revised version of the document by April 22. DEQ should be getting me their comments by the end of the week. If Lockheed can review the document during the week of April 22, we can see if there are any show-stoppers. We may be able to meet the goal of getting this final in April. But to be realistic, we may need a bit more time to get this to a final version.

Thanks,
Emy

Emy,

Attached are our comments on the draft five-year review report completed for the former Martin Marietta Reduction Facility located in The Dalles, Oregon. If applicable, we will supplement this letter with any comments on the two additional recommendations that you are currently working on related to the air sampling program and the PAH clean-up level.

Please contact me with any questions or comments.

Thanks,

Brian
